THE COMMONWEALTH OF AUSTRALIA.

Habitual Sunshine and Prosperity. The Paradise of Opportunities.

The six States of New South Wales, Victoria, Queensland, South Australia, Western Australia, and Tasmania compose the Commonwealth of the great Island Continent of Australia in the Southern Seas.

Australia sweeps over 2,974,500 square miles of Territory—twenty-five times greater than the United Kingdom.

Its population is only 4,802,174, or about 1.6 persons to the square mile.

Of its tremendous area only 12,000,000 acres have been brought under cultivation; yet the value of its agricultural production annually is £45,000,000, and is rapidly increasing.

Australia's vast extent gives it a wide climatic range and a wonderful variety of rich soils. These work together for the production of every kind of cereal and root crop, fruit, vegetable, and domestic animal.

Australia's handful of people annually produce wealth to the value of £188,000,000, and have developed an external trade worth £157,000,000 annually—nearly £34 per head; a world's record.

In the Savings Banks of the Commonwealth 2,000,000 depositors—about two in every five inhabitants—have placed £75,000,000 sterling, equal to £38 10s. per depositor. This one fact indicates a thriving prosperity.

Australia is the best of the New Countries, the least developed, the richest in resources, and offers unrivalled opportunities to the man both with and without capital.

The fullest information concerning  
AUSTRALIA will be given on  
application at the Office of . . .

THE HIGH COMMISSIONER FOR THE COMMONWEALTH OF AUSTRALIA,  
72 Victoria Street, Westminster, London, S.W.
